IMPORTANT INFORMATION.

In ordering manuscript copies much time will be saved if the order states specifically what is desired, viz:

- Application as originally filed. (Petition, specification, oath, and drawings as received.) Application as amended. (Petition, specification, oath, and drawings with amendments entered.)
- Application as allowed. (Petition, specification, oath, and drawings as passed by the examiner for issue.)
- Original application. (Facsimile petition, specification, oath, and drawings at present time.)
- Specification as originally filed. (As received in office.)
- Specification as amended. (With amendments entered.)
- Specification as allowed. (As passed by the examiner for issue.)
- Original specification. (Facsimile at present time.)
- File wrapper. (File wrapper only.)
- File wrapper and contents. (File wrapper, contents of record, including photoprints of any tracings or of prints within file wrapper. In patented cases, printed copy of the specification and drawings of the patent is furnished.)
- File wrapper, contents, and drawings. (File wrapper and all of the contents of record, including photoprints of any tracings, exhibits, or prints within the file wrapper. In pending cases, photoprints of the pending drawings only, omitting any canceled. If patented, copy of the specification and drawings of the patent being furnished, photoprints are not made of the original drawings unless specially ordered. If canceled drawings are wanted, they must also be specially ordered.)
- Assignment. (Give the liber and page of the record as well as the name of the inventor.)
- Printed publications in possession of the office. (Give title and date of publication, also page and exact portion to be copied.)
- Orders for copies of any other records not mentioned above must state specifically the exact papers to be copied.

Attached to certified manuscript copies.....per sheet..	. 15

Models:

Certificate to duplicate (duplicate model to be furnished by party ordering certificate).....	. 50
---	------

This office has no printed copies of foreign patents for sale.

In ordering photographic copies of drawings of foreign patents cited as references, applicants must state the date and number thereof, the name of the patentee, the country in which each patent was granted, and the class and subclass in which the patent is classified. If the class and subclass were not given in the office letter citing the patent, the applicant must state the serial number of the application in which it was cited, the number of the action therein, the name of the inventor, and the title of the invention.

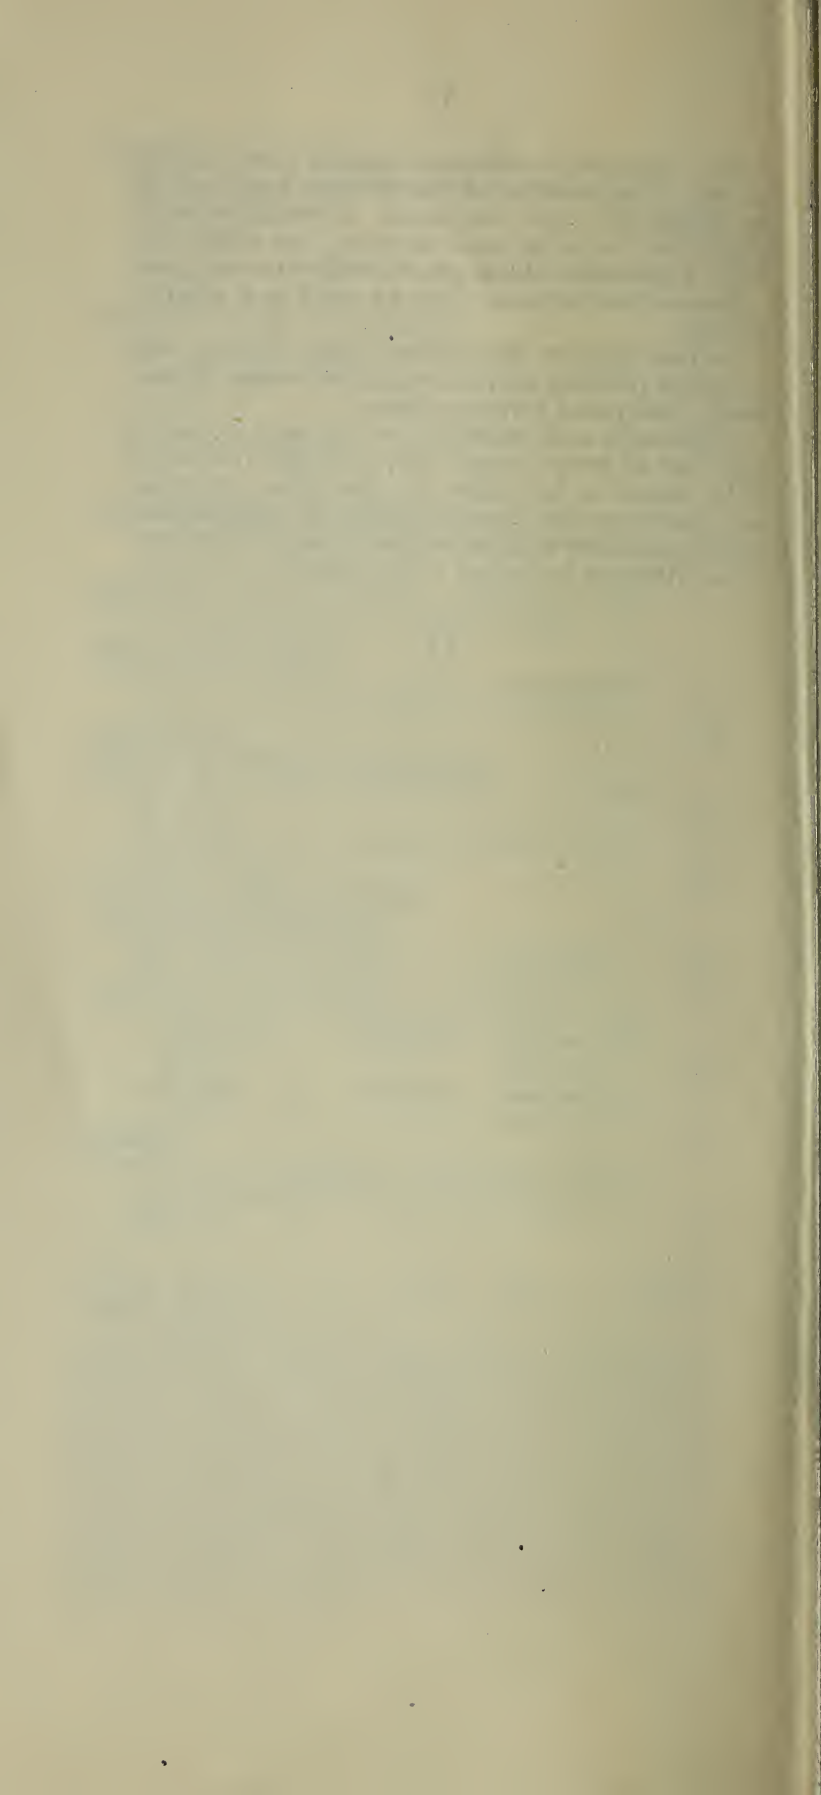

The photoprints will be furnished more expeditiously if the number of the division is also given in which they may be found. A separate order should be made for each drawing, for which the office will furnish blanks gratuitously upon request.

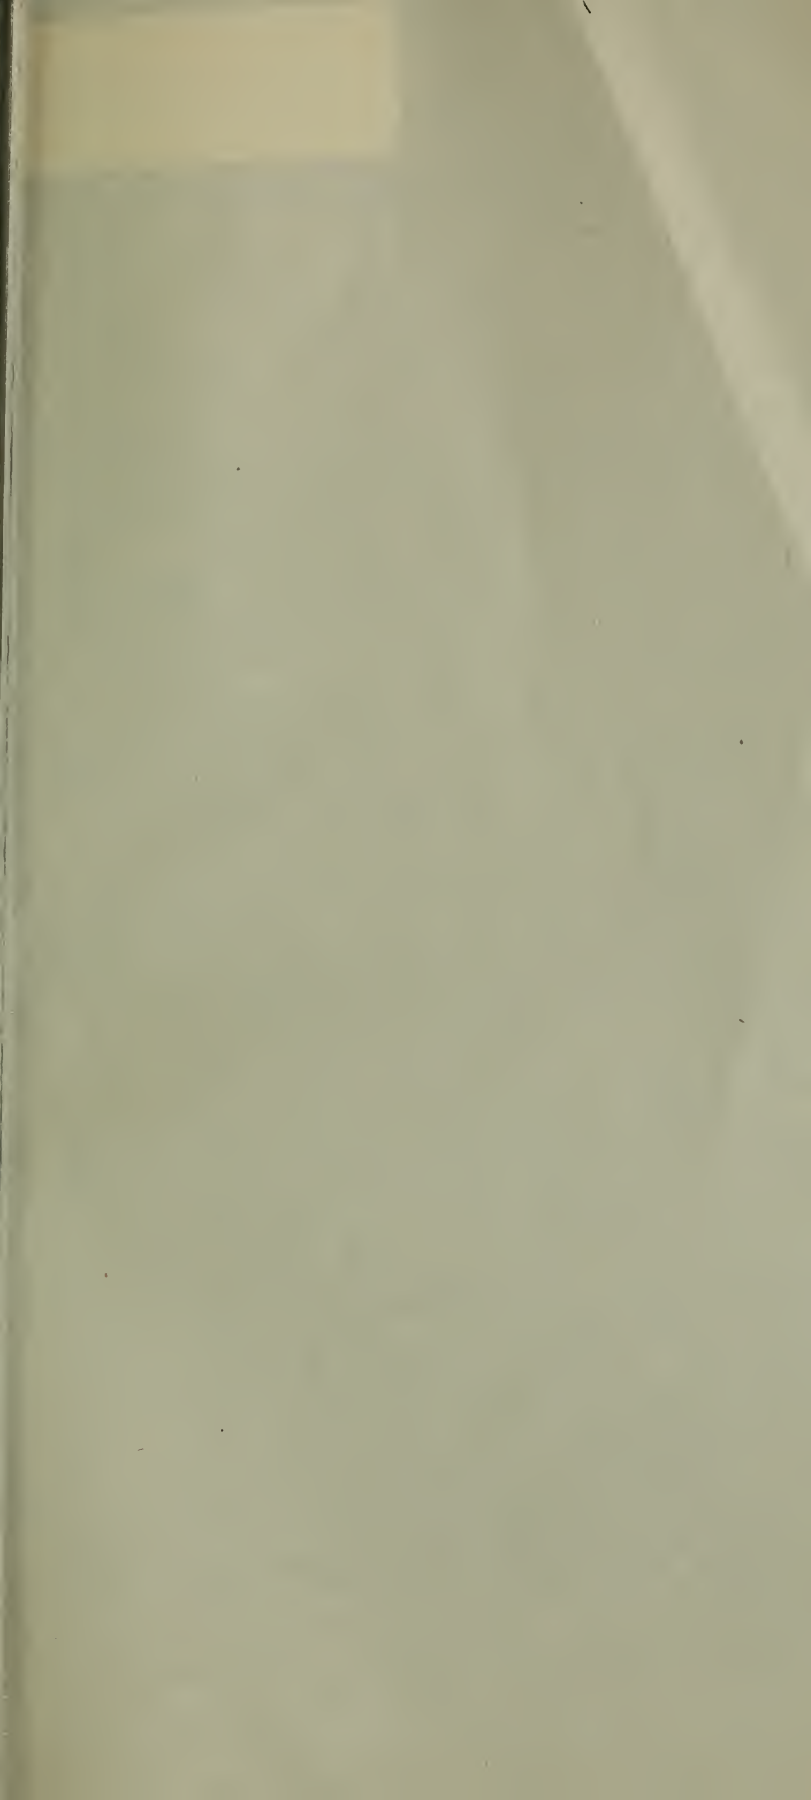

BOUND VOLUMES CAN NOT BE USED FOR MAKING PRINTS.

Failure to give the fullest data whereby the mounted drawing may be found will cause unnecessary delay and correspondence.

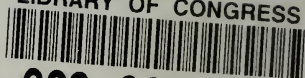

Applicants and attorneys are strongly urged to file a set of prints, small size, 8 by 12½ inches, or order them to be made by the office, 15 cents per sheet, at the time of filing an application. Such procedure will save delay later, if correction of the drawing is desired or required.
